

# STEEPLECHASE MOCK WITH SOLUTIONS

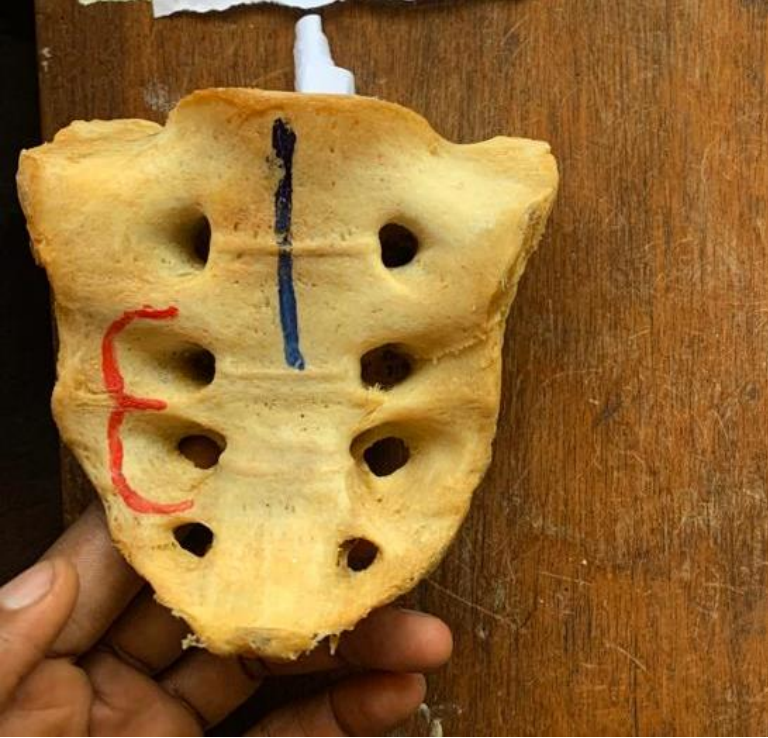

- A) What type of joint is at the area painted Red? **SECONDARY CARTILAGINOUS JOINT**
- B) What structure attaches to the area painted Blue? **TRANSVERSUS THORACIS/ STERNOCASTALIS**
- C) How many ossification centres does the Xiphoid process have? **One(1)**

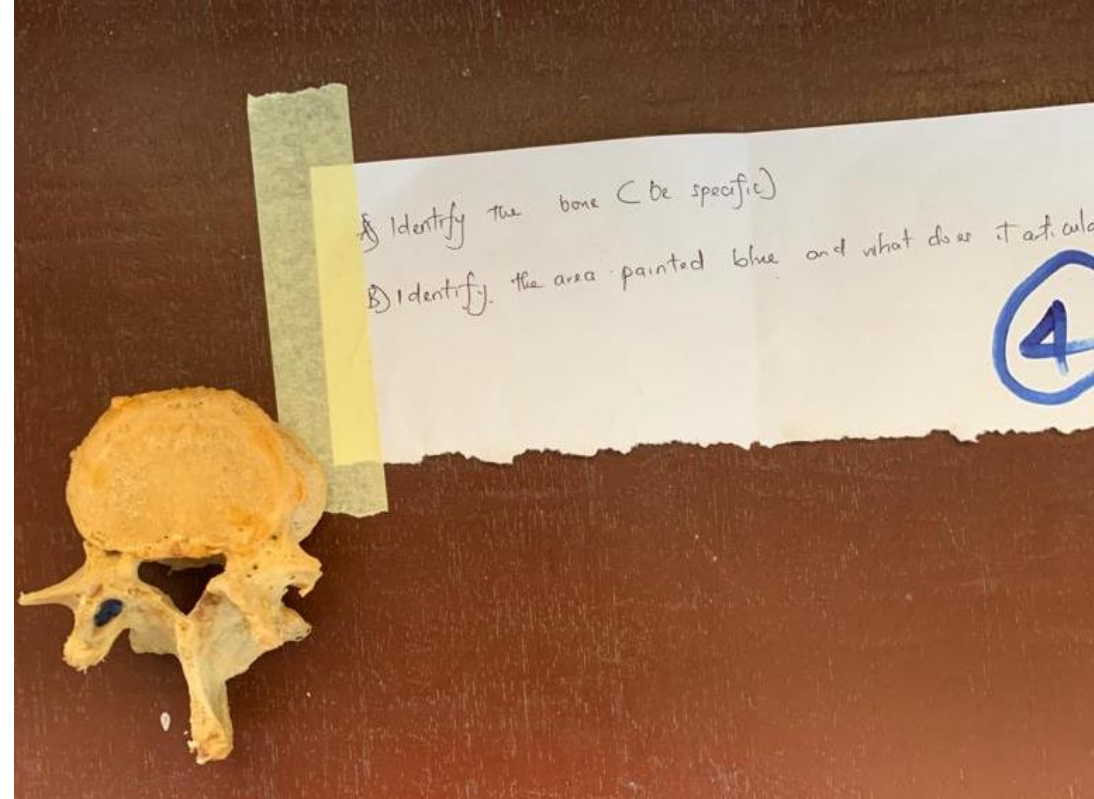

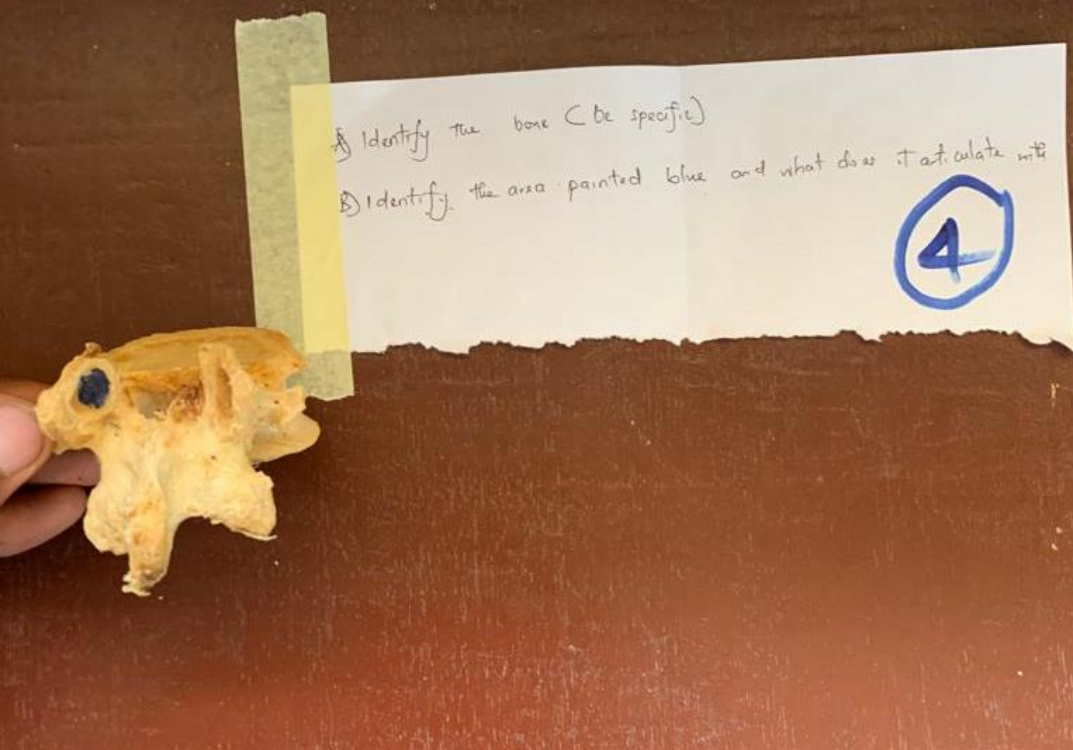

- A) Identify the rib (Be specific) **RIGHT RIB**
- B) What structure passes through the area painted blue? **INTERCOSTAL VESSELS & NERVE**
- C) What structure attaches to the area painted red? **LATERAL COSTOCHONDRAL JOINT**
- D) The rib ossifies in membrane T/F? **False**

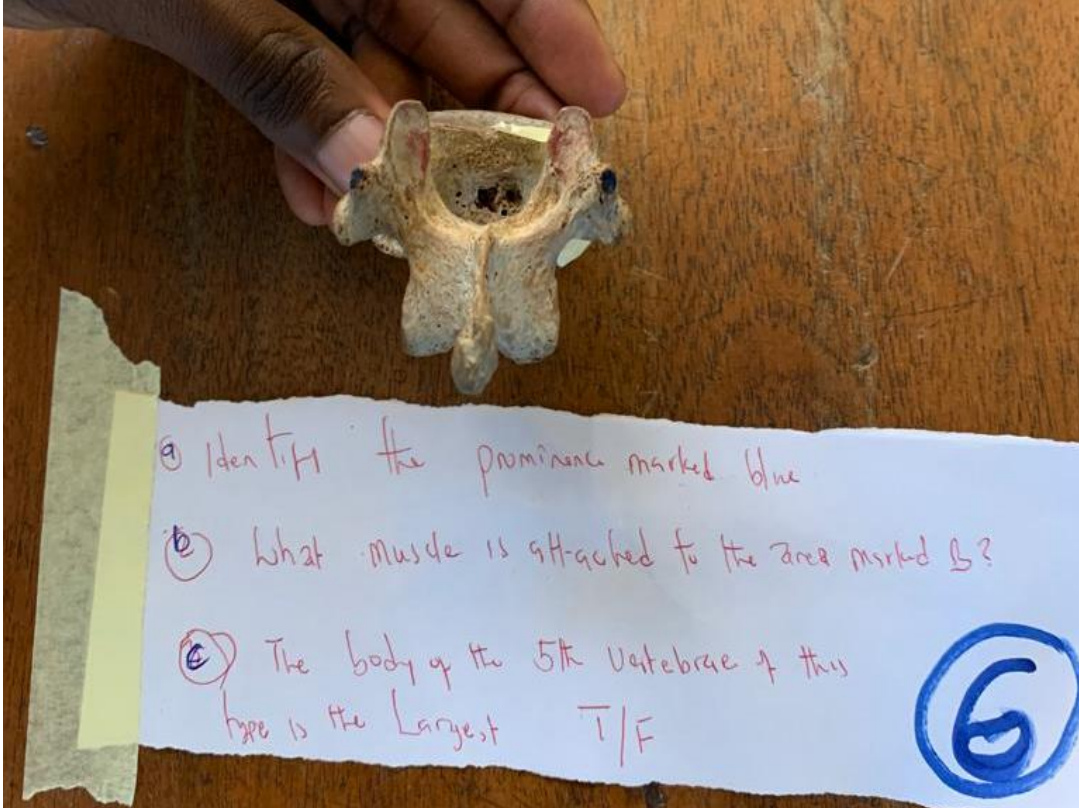

- A) What structure attaches to the area painted Red? **PIRIFORMIS MUSCLE**
- B) What structure is closely related to the area painted Blue? **MEDIAN SACRAL ARTERY**
- C) List the contents of the area Probed
  - i) **COCCYGEAL NERVE**
  - ii) **FILUM TERMINALIS**
  - iii) **VENOUS PLEXUS**

- A) Identify the bone (Be specific) **LUMBAR VERTEBRAE**  
B) Identify the area painted blue and what does it articulate with? **SUPERIOR ARTICULAR FACET - INFERIOR FACET OF UPPER VERTEBRA**

- A) Identify the prominence marked Blue **MAMMILLARY PROCESS**  
B) What muscle is attached to the area marked B? **PSOAS MAJOR**  
C) The body of the 5<sup>th</sup> vertebrae of this type is the largest T/F **TRUE**

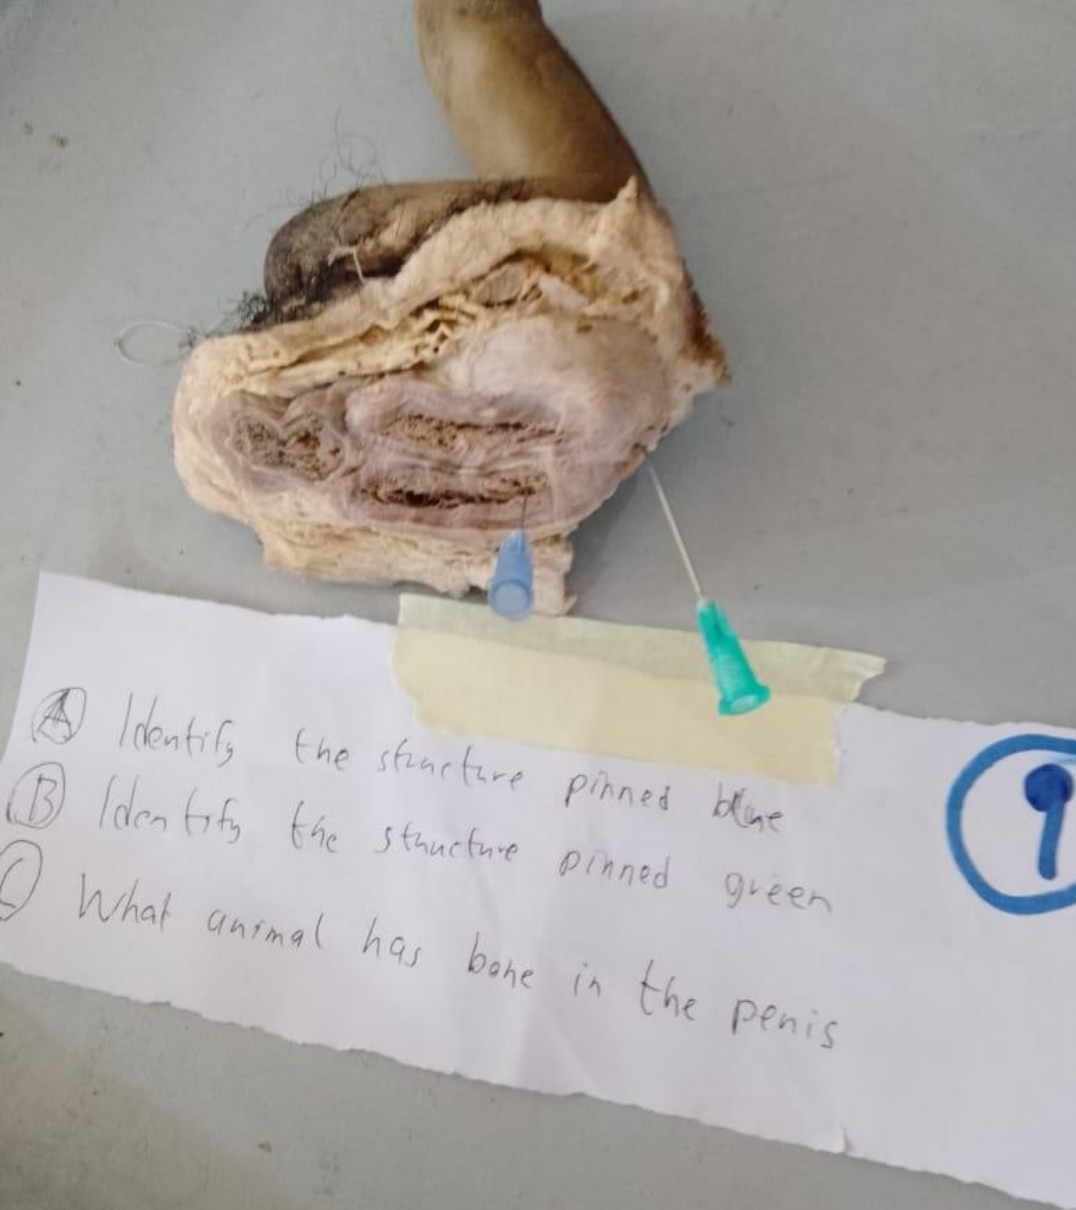

- A) Identify the structure pinned Green **MINOR CALYX**
- B) The structure pinned green develops from the Metanephric Blastema T/F? **FALSE**
- C) Identify the structure pinned Blue **RENAL PAPILLAE**

- A) Identify the organ. Be specific **LEFT KIDNEY**
- B) Identify the tied structure "A" and state its length **URETER – 25cm**
- C) Identify the structure "B" **SUPRARENAL VESSELS**

- A) Identify the structure pinned Blue **CORPUS CAVERNOSA**  
B) Identify the structure pinned green **DEEP DORSAL VEIN OF PENIS**  
C) What animal has bone in the penis? **HORSE, DOG, BATS, GORILLA**

- A) Identify the nerve supply of the structure pinned green **DORSAL NERVE OF THE PENIS**
- B) Blood supply to the area pinned blue **ACETABULAR BRANCH OF OBTURATOR ARTERY**
- C) Lymph node of the pinned green structure **DEEP INGUINAL LYMPH NODE OF CLOQUET**

- A) Identify the structure tied "A" **PSOAS MINOR**
- B) Identify the tied structure "B" **OBTURATOR NERVE**
- C) Nerve root of B **L2, L3, L4**

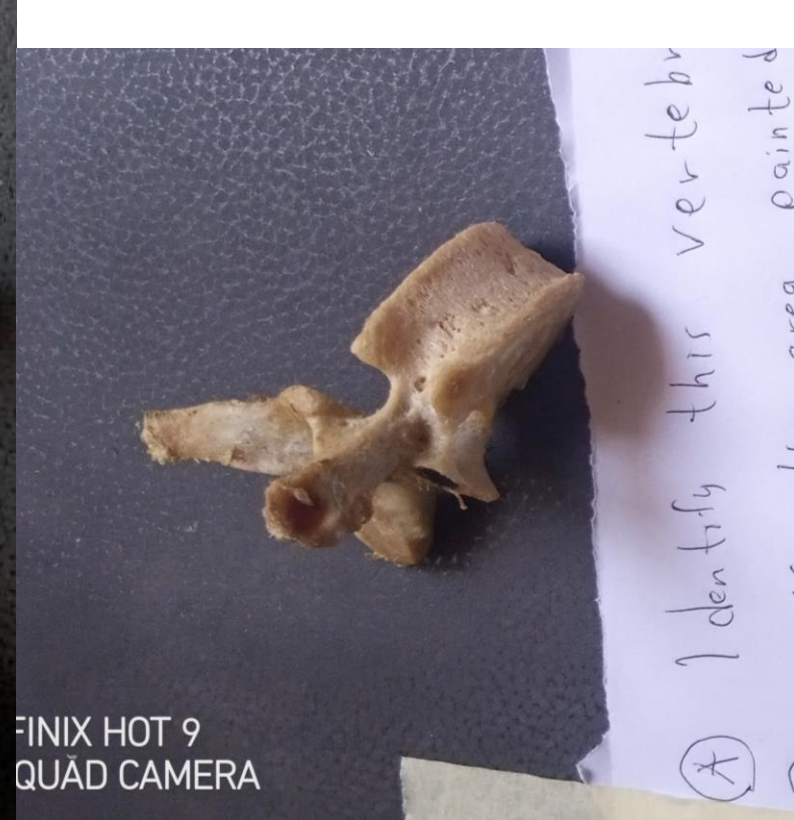

A) Identify the structure pinned green

**LIGAMENTUM TERES HEPATIS**

B) During IUL, A exists as? **LEFT UMBILICAL VEIN**

C) What organ is related to the area pinned blue;  
what's its weight? **KIDNEY, 90g**

- A) Identify this Vertebrae **THORACIC VERTEBRAE**
- B) Identify the area painted red **TRANSVERSE COSTAL FACET**
- C) The area painted blue articulates with the rib of the same number T/F **TRUE**

- A) Blood supply to the area pinned Green **RIGHT GASTROOMENTAL/GASTROEPIPLOIC ARTERY**
- B) Blood supply to the area pinned Blue **R&L GASTRIC ARTERY**

- A) Identify the tied structure **SPLenic VESSELS**
- B) What is the weight of this organ **7oz**

- A) Identify the pinned structure green **URETHRA**  
B) Identify the pinned structure Blue **BUCK'S FASCIA**

- A) Identify the pinned structure **VERMIFORM APPENDIX**
- B) Identify the embryological origin of the pinned structure (Be specific) **CAECAL DIVERTICULUM**
- C) The structure is a retroperitoneal organ T/F? **TRUE**

A) Identify the tied structure "A" **SUBCOSTAL NERVE**

B) Identify the insertion of the pinned structure Blue **LESSER TROCHANTER OF FEMUR**

- A) Identify the structure pinned Blue **LEFT TRIANGULAR LIGAMENT**
- B) Identify the structure pinned green, and where is it related to? **BARE AREA - DIAPHRAGM**
- C) Identify C **IVC**

A) Identify the rib. Be specific **2<sup>ND</sup> RIB**

B) What structure originates from the area painted blue? **SERRATUS ANTERIOR**

- A) Identify the structure pinned green. Be specific **RIGHT AURICLE**
- B) Identify the tied structure. Be specific **LEFT SUPERIOR PULMONARY VEIN**
- C) Identify the structure pinned Blue **LEFT COMMON CAROTID ARTERY**

- A) Identify this Organ (Be specific) **LEFT LUNG**  
B) What vein arches over pinned area? **NOTHING**

- A) Identify the pinned structure Green **S1**  
B) Identify the probed Space **RECTOVESICAL POUCH**

- A) Identify the pinned structure Blue **INFERIOR MESENTERIC ARTERY**  
 B) Embryological Origin of pinned structure Green? **ANNULAR FIBROSUS**

- A) Identify the structure pinned - **GLISSON'S CAPSULE**
- B) Identify the structure related to probed space - **IVC**

- A) Identify the tied structures "A" **FEMORAL NERVE**
- B) Identify the tied Structure "B" **FALLOPIAN TUBE**
- C) Identify the type of joint in the area pinned Blue **SECONDARY CARTILAGINOUS JOINT**

- A) Identify the pinned structure "C" **CRISTA TERMINALIS**  
B) Identify the pinned structure Blue **MITRAL VALVE**

- A) Identify the taped area **COLIC IMPRESSION**
- B) Embryological origin of this organ **DORSAL MESOGASTRIUM**

- A) Identify the tied structure and name its embryological Origin (Be specific)  
**LIGAMENTUM TERES HEPATIS – LEFT UMBILICAL VEIN**
- B) Identify the structure pinned Green **CAUDATE LOBE**
- C) State the capacity of the structure pinned blue and its embryological origin **30-50ml – PARS CYSTICA**

- A) Identify the structure tied and state its function **PULMONARY LIGAMENT – LUNG EXPANSION**
- B) Identify the structure pinned Green **PULMONARY ARTERY**
- C) Side this organ **RIGHT LUNG**

- A) Identify this bone (Be specific) **RIGHT PELVIC BONE**
- B) What structure inserts at the area painted Blue **EXTERNAL OBLIQUE MUSCLE**
- C) What structure passes through the area painted Red **PUDENDAL NERVE & VESSELS**

- A) Identify the bone (Be Specific) **RIGHT CLAVICLE**
- B) Identify the muscle attached to the area painted blue **SUBCLAVIUS MUSCLE**
- C) Identify the structure attached to the area painted Red **CONOID LIGAMENT**

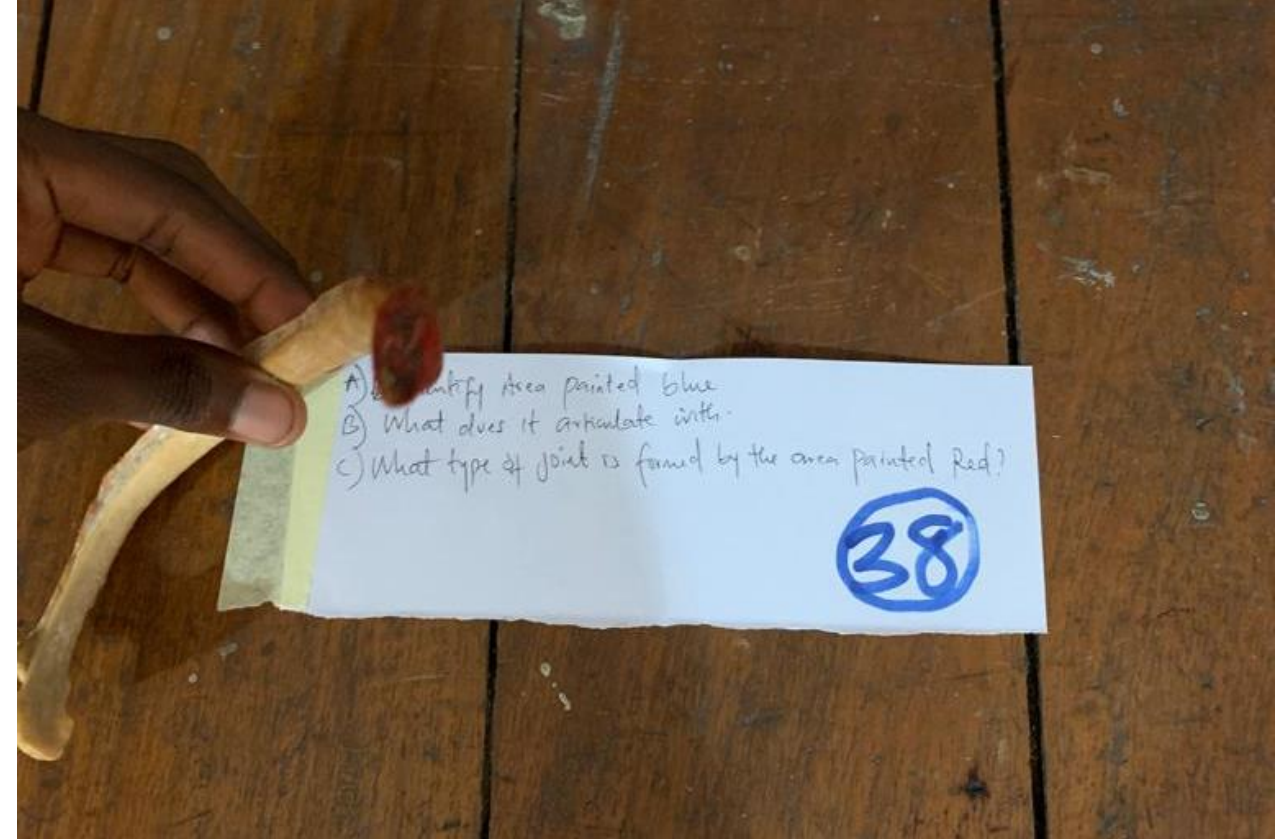

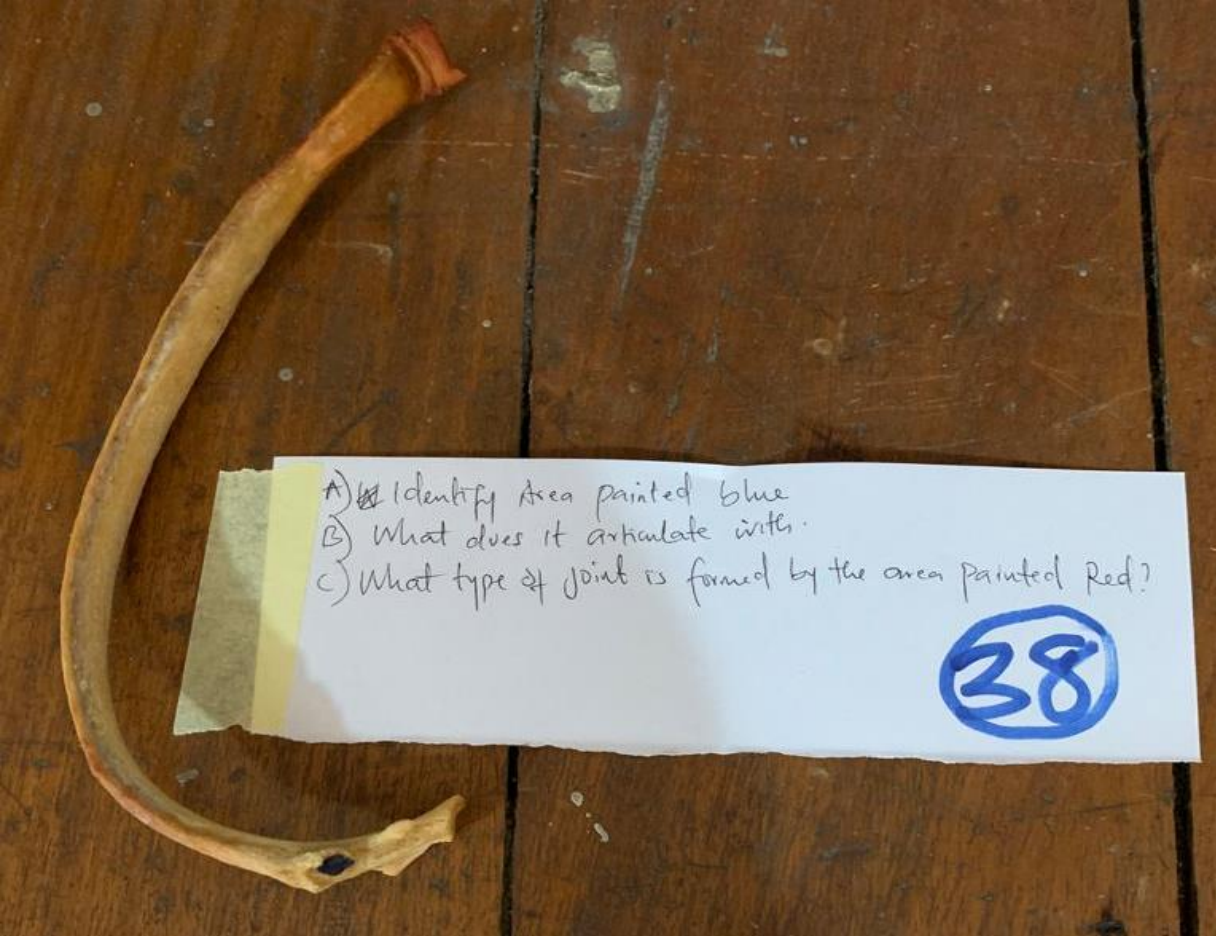

- A) The structure painted red is at what vertebral level? **S2**
- B) What structures (2) are attached to the area painted Blue **RECTUS FEMORIS, ILIOFEMORAL LIGAMENT**
- C) What type of cartilage is found in the Taped Area? **FIBROCARILAGE**

- A) What structures pass through the Probed Area? **SPINAL CORD, SPINAL MENINGES**
- B) What structure is directly related to area painted Blue? **ANTERIOR LONGITUDINAL LIGAMENT**

- A) Identify Area painted Blue **ARTICULAR FACET**
- B) What does it articulate with **COSTAL FACET OF TRANSVERSE PROCESS**
- C) What type of joint is formed by the area painted Red? **PRIMARY CARTILAGINOUS JOINT**

- A) What ligament attaches to the area painted red? **RADIATE LIGAMENT**
- B) The Middle band of ligament is attached to the vertebral Body T/F? **FALSE**
- C) What articulates with area painted Blue? **NOTHING**

- A) Identify the structure pinned Blue **APPENDICE EPIPLOICAE**  
B) Identify the tied structure INTERNAL **THORACIC VESSELS**

- A) What is the main arterial supply to the organ pinned green? Name its Larger branch **SPLenic ARTERY – ARTERIA PANCREATICA MAGNA**
- B) The organ pinned green is entirely retroperitoneal T/F - **FALSE**
- C) The body of the organ pinned Green lies at what vertebral level **L1**

- A) Identify the muscle pinned green **QUADRATUS LUMBORUM**
- B) What is the vertebral level of the structure pinned blue **L4**
- C) Nerve root of the tied structure **(CHECK NO 44 CORRECTION)**

INFINIX HOT 9  
AI QUAD CAMERA

- A) Identify the structure pinned Green **MEDIAN SACRAL ARTERY**
- B) Identify the nerve root of the tied structure **L1, L2**

- A) Identify the structure pinned blue **PERICARDIUM**
- B) Identify the nerve root of the structure tied **L2, L3 (LATERAL CUTANEOUS NERVE OF THIGH)**

- A) What structure is related to the area pinned blue? **DESCENDING THORACIC AORTA**
- B) Identify the structure pinned Green (Be specific) **INFERIOR PULMONARY VEIN**
- C) Identify the tied structure **LINGULA**

- A) What is the length of the root of the structure pinned Blue? **6INCHES**
- B) Failure of the root of the structure pinned blue to fuse over its entire length forms what Hernia? **INTRAPERITONEAL HERNIA OF WALDEYER**
- C) There are 4 to 5 rows of Arterial Arcades with short Vasa Recta Supplying the structure tied T/F? **TRUE**

- A) What Space is probed? **TRANSVERSE PERICARDIAL SINUS**
- B) What is the embryological origin of the structure pinned green **ABSORPTION OF PULMONARY VEIN**
- C) Venous drainage of the structure pinned green **OBLIQUE VEIN OF MARSHALL**

- ~~502~~ ~~499~~ gastric
- a) What is the arterial supply of the fundus?
- b) What is the length of the ~~small~~ intestine?
- c) What is the embryonic origin of Diaphragm?
- ~~d)~~

- A) What is the arterial supply of the gastric fundus? **SHORT GASTRIC ARTERIES**
- B) What is the length of the small intestine? **6m**
- C) What is the embryological origin of Diaphragm? **SEPTUM TRANSVERSUM...**

- A) What are the structures related to the area taped "A"?  
**OBTURATOR NERVE, ILIOLUMBAR ARTERY, LUMBOSACRAL TRUNK, SYMPATHETIC TRUNK (mnemonic: OILS <Lateral to medial>)**
- B) List 3 structures than can be seen at the vertebral level of the place labelled "B"  
i) **Arch of aorta**  
ii) **Bifurcation of pulmonary trunk**  
iii) **Carina**
- C) What structure lies at the place labelled C?  
**LOWER TRUNK OF BRACHIAL PLEXUS**
- D) What structure is situated at the place painted Black?  
**GANGLION IMPAR**
